Claims 22-24 are presented for examination.

Applicants' information disclosure statement filed May 1, 1998 and the amendment filed October 30, 2003 have been received and entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 22-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 22, the phrase "including" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claims 23 and 24 are rendered indefinite to the extent that they incorporate the above terminology.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 22-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Wood et al. (U)

Wood et al. teach the structure of naturally-occurring (+)-methyl 3,4-anhydroshikimate. Note the compound's chemical structure of formula II is the same as applicants' formula disclosed in claim 1 and the preferred compound disclosed in claim 24. Clearly, the cited reference discloses the applicants' instant

Art Unit: 1614

compounds; therefore, the instant compounds are unpatentable. Applicants are not entitled to procure claims based on discovery that well-known and old compounds can be adapted to new uses: the entitlement to a patent, the compounds must be both new and unobvious to one skilled in the art. (See In re Hack 114 USPQ 161).

Claims 22-24 are not allowed.

The references listed on the enclosed PTO-892 are cited to show the state of the art.
